

Two lads on site doing some pruning, this will let more light onto our top plots

Wind going away from the houses so getting fired up

Next day the left overs will be used as a top dressing plus going into my compost ingredients

Compost days for me are Mondays; Sunday night we had a good frost, this was the scene upon taking my first layer of carpet off my compost, worms making love...aww...they must be happy, meaning they have food, warmth and moisture

Used a load of spent hops recently. Back down again for another load

Green team bought me a card and my xmas box they had made, a wooden xmas tree. Superior beings!

Tesco shopping sunday, first place I go is the restaurant for my spent coffee grounds

They come with a load of gumph, get rid!  
I will break all these up so I have a powder

Fruit training on the plot still in progress,  
renewed some of my wires

Leaf collecting time...saw these in Wilko,  
£3.50 a set, nice

My last fruit tree I planted now has the straining  
posts. I shall put wires on next week

My next talk
